

Vision

Building the infrastructure for communities to grow while maintaining deep, meaningful relationships.

What we do

Opine has 4 key features:

Member-Centric Community Intelligence

Opine derives actionable insights for community managers by analyzing member sentiments through comprehensive member health profiles. These profiles are analyzed through 3 key lenses: time, impact and scale, allowing community managers to pinpoint individual opportunities and community-wide risks.

Pulse Checks

Opine delivers lightweight surveys that surfacing actionable themes across clusters of people through combining consistent baseline questions with AI-generated follow-ups tailored to each member.

Micro-group matching Algorithm

Opine fosters deeper and richer relationships within communities by eliminating "loneliness in a crowd". Our engine pairs new members with senior "anchors" based on behavioural and preference profiles to promote social onboarding into the larger community.

Event Management Platform

Opine provides an administrative layer that manages memberships, feedback collection, and RSVPs.

Where are we now?

Opine currently has pilots with 8 student communities, with 200+ users and 1000+ interactions on our platform. We are actively engaging these community leaders to iterate on our features and are looking to understand the needs of other types of communities.

Who are we?

Opine was born of our passion in serving communities. We are a team of 3 who have turned our passion into helping communities flourish. If this speaks to you, we'd like to hear your story. Feel free to reach out to Brejesh (brejesh.bhaskaran@opine.asia), Gabriel (gabriel.sidik@opine.asia) or Zheng Seng (quekzhengseng@opine.asia).
